

BraindumpQuiz

- ✓ Online Tool, Convenient, easy to study.
- ✓ Instant Online Access
- ✓ Supports All Web Browsers
- ✓ Practice Online Anytime
- ✓ Test History and Performance Review
- ✓ Supports Windows / Mac / Android / iOS, etc.

- ✓ Installable Software Application
- ✓ Simulates Real Exam Environment
- ✓ Builds Exam Confidence
- ✓ Supports MS Operating System
- ✓ Two Modes For Practice
- ✓ Practice Offline Anytime

- ✓ Printable PDF Format
- ✓ Prepared by IT Experts
- ✓ Instant Access to Download
- ✓ Study Anywhere, Anytime
- ✓ 365 Days Free Updates
- ✓ Free PDF Demo Available

Security & Privacy

We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

Money Back Guarantee

Full refund if you fail the corresponding exam in 90 days after purchasing. And Free get any another product.

Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.

Exam : **C2150-810**

Title : IBM Security AppScan Source
Edition Implementation

Vendor : IBM

Version : DEMO

NO.1 You just scanned an application with over total 10,000 findings. Many of the findings are in a particular API, which you know is not vulnerable.

Without re-scanning the application, what should you do to reduce the number of visible findings in the assessment?

- A. Create a custom rule.
- B. Create a custom filter.
- C. Set the severity of each finding to Info.
- D. Set the vulnerability type of each finding to null.

Answer: D

NO.2 To scan JavaScript included within an ASP.NET application, which additional steps must be completed to ensure these artifacts are scanned?

- A. Create a C# project type
- B. Import the Visual Studio Solution
- C. Build a build.xml file and add it to the application project
- D. Manually create a JavaScript project type and add it to the application

Answer: B

NO.3 Which two languages can be scanned by the AppScan Source CLI?

- A. C++
- B. Java
- C. Fortran
- D. Haskell
- E. ActionScript

Answer: A,B

NO.4 You are reviewing a thick client application and come upon File Injection findings in a function that opens zip files and extracts data from them, but the customer you are working with tells you that the data is sanitized using a method `mySanitizer.validateZip(..)`. You confirm this and decide to remove this vulnerability and other File Injection findings with sanitized data using the Remove functionality of the Trace section in the Filter Editor.

What do you need to do in the Trace Rule Entry dialog to ensure that the rule you create applies only to this application's zip extractor and not all File Inclusion findings?

- A. Specify Sink method name.
- B. Specify File Inclusion as Sink property.
- C. Specify File Inclusion as Source property.
- D. Add `validateZipO` to the Required Calls section.
- E. Add `validateZipO` to the Prohibited Calls section.

Answer: B

NO.5 You are reviewing an online shopping application and find a lost sink method called `combineItemListsf..`) that is provided by a third-party shopping framework. This method combines two lists of items (provided as arguments) into one.

Which type of custom rule do you need to create for this method?

- A. Sink
- B. Source
- C. Taint Propagator
- D. Tainted Callback
- E. Not Susceptible to Taint

Answer: C

NO.6 What is the best practice for scanning an Android application?

- A. Import Workspace, Scan Application
- B. Install Eclipse IDE, Scan Application
- C. Add JAVA files manually, Add Dependencies. Scan Application
- D. Verify build succeeds in Eclipse. Import Workspace, Scan Application

Answer: C

NO.7 What is the difference between AppScan Source Developer and AppScan Source Remediation licenses?

- A. AppScan Source for Remediation supports only Visual Studio while AppScan Source for Developer supports both Eclipse and Visual Studio.
- B. AppScan Source Developer allows you to run scans from CLI, while AppScan Source Remediation allows you only to remediate security issues.
- C. AppScan Source Developer allows you only to remediate security issues, while AppScan Source Remediation allows you to run scans from within the IDE.
- D. AppScan Source Developer allows you to run scans from within the IDE, while AppScan Source Remediation allows you only to remediate security issues.

Answer: A

NO.8 Which two licenses can be used for AppScan Source IDE plug-ins?

- A. IBM Security AppScan Source for Quality
- B. IBM Security AppScan Source for Analysis
- C. IBM Security AppScan Source for Developer
- D. IBM Security AppScan Source for Automation
- E. IBM Security AppScan Source for Remediation

Answer: C,D
